17 Zone Reflow Oven - 2156 M

17 Zone Reflow Oven - 2156M

The 2156 MK7 reflow oven is a high volume reflow oven system with 17 heated zones and belt speeds up to 1.88m/min. The 2156 MK7 offers the lowest delta T's, reduced nitrogen and electrical consumption and advanced flux management options. The 12" wide heater modules offer profile compatibility with competitor systems.

- Built-in Thermal Monitoring
- Nitrogen Capable to < 100 ppm
- Energy Management System
- Virtually No Maintenance
- 12" Wide Heater Modules

Reflow Oven Length	869 cm (342")
Process Gas Options	Air, Nitrogen
Heated Zones	Convection: 10 Top / 10 Bottom
Cool Zones	5 Top (Bottom Option)
Max Working Temperature	Standard: 350°C (Option: 400°C)
Maximum PCB Width	55.9cm (22")
Cleanroom Option	Down to Class 1000
