SM-350 PCB

SM-350 PCB

- Using touch screen control interface, easy to understand
- The loading direction of the track can be switched at will, left→right or right→left
- The front end has a brush function, which has strong decontamination ability
- Electrostatic removal devices are equipped at the in and out positions of the PCB board to reduce poor mount and electrostatic damage caused by static electricity during the mount process
- With counting function and numerical control speed display function
- Adhesive roll paper replacement cycle reminder function
- Anti static cleaning brush and vacuum cleaner to ensure efficient and stable cleaning effect
